PERSONAL DETAILS

Current Location	Vijayawada
Date of Birth	May 28, 2005
Male	

EDUCATION

Graduation

Course	B.Tech/B.E. (Computers)
College	Rajiv Gandhi University of Knowledge Technologies (RGUKT), Nuzvid
Score	8.8%

Schooling	Class XII	Class X
Board Name	Other	Andhra Pradesh
Medium	English	English
Year of Passing	2023	2021
Score	99%	100%

PROJECTS

Endorsement Daap | October 2025 - November 2025

- The Endorsement DApp is a decentralized application built using Solidity, Foundry, and React, designed to securely manage professional endorsements on the blockchain. It allows users to give, receive, and verify endorsements for skills or achievements in a transparent and tamper-proof manner. Each endorsement is stored on the blockchain, ensuring authenticity, trust, and immutability. The platform supports role-based access, easy verification, and a user-friendly web interface, creating a reliable system for validating skills in academic and professional environments.

Voting Daap | September 2025 - September 2025

- I created decentralized application for voting system with limited candidate will participate and everyone else can participate and cast their vote when the election commissioner started the election and it will end after some given time and then election commissioner can announce the result . By this we can prevent scams in the voting system and no one will count the number of instead of that our code will count the votes no one can interrupt the counting we can also see the deployed code if we have any doubt in that so that we can prevent rigging during our election.

FIR filling daap | August 2025 - August 2025

- FIRChain is a blockchain-based decentralized FIR filing system that ensures transparency and security in law enforcement. It allows administrators to securely onboard police officers, who can then file immutable and tamper-proof FIRs on the blockchain. Once filed, FIRs cannot be altered or deleted, making the system corruption-resistant. Citizens can publicly view FIRs, ensuring accountability and trust in the process. This decentralized approach promotes efficiency, reliability, and fairness in justice delivery.

WORK EXPERIENCE

Sure Trust | October 2025 - Present

- Web Developer

Helping Hands Organisation | April 2024 - September 2025

- Class Helping Hands Representative:A volunteer class representative in the Helping Hands organization serves as a bridge between students and the organization. They encourage classmates to participate in service activities and bring forward their ideas. By organizing and coordinating events, they ensure that everyone feels involved and valued. With empathy and responsibility, they inspire the class to make a meaningful impact in the community.

National Service Scheme (NSS) | September 2023 - September 2025

- Volunteer:As an NSS volunteer, I actively participated in community service activities. I planted trees to promote a greener environment and joined a rally to spread awareness about women's safety. I also took part in cleanliness drives to keep my surroundings healthy and hygienic.
